Cash Balance Plans Surge 17% While 401(k) Growth Remains Flat

Tax advantages and the need to catch up on retirement savings make Cash Balance the fastest growing sector of the retirement plan market

Every year since 2008, Kravitz has published an in-depth analysis of the latest IRS Form 5500 filings for Cash Balance retirement plans.* The annual growth in new plans, regional trends, plan asset growth and other statistics are provided as a reference for retirement plan professionals and others interested in learning more about Cash Balance plans.

Highlights:

• **The number of new Cash Balance plans increased 17% compared with just 3% growth in new 401(k) plans:** Surpassing industry projections of 12 to 15% growth, the number of new Cash Balance plans adopted by employers increased 17% in 2015, the most recent year for which complete IRS Form 5500 filing data is available.

• **Small businesses continue driving Cash Balance growth:** 92% of Cash Balance Plans are in place at firms with fewer than 100 employees.

• **Market volatility and uncertainty over tax rates have not slowed Cash Balance growth:** Despite frequent market volatility and political uncertainty over issues such as tax reform and retirement plan regulations, adoption of new Cash Balance plans has continued to accelerate. Between 2010 and 2015 alone, we saw a 152% increase in new plans nationwide.

• **Increasing diversity of companies adopting Cash Balance plans:** While medical/dental groups and law firms still make up about 40% of the market, Cash Balance plans are becoming increasingly popular across the business world, from the technology sector to retail and manufacturing.

• **Cash Balance plans now make up over 34% of all defined benefit plans, up from 2.9% in 2001:** The rising popularity of Cash Balance plans has coincided with a steady decline in traditional defined benefit plans due to ongoing challenges with risk and cost volatility.

• **IRS regulations allowing broader Cash Balance investment options have accelerated plan growth:** The ‘Actual Rate of Return’ option and other new investment choices approved in the 2010 and 2014 Cash Balance regulations made plans more flexible for employers and removed certain funding issues. The number of large plans using Actual Rate of Return has increased almost 20%.

*Source: Analysis performed by Kravitz, Inc., using data from IRS Form 5500 filings via the Judy Diamond Associates, Inc. database. The 2015 plan year data is the most current complete data set available. Additional data on defined contribution and defined benefit plans comes from Private Pension Plan Bulletin Abstracts by the U.S. Department of Labor Employee Benefits Security Administration (EBSA), and the Plan Sponsor Council of America (PSCA) 59th Annual Survey of Profit Sharing and 401(k) Plans.

# Introduction & Research Highlights

**Cash Balance Plans: Growth 2001 to 2016**

The popularity of Cash Balance plans has soared since 2001, with double-digit annual growth each year.

**Cash Balance Plans as a Percentage of All Defined Benefit Plans**

Over the past 15 years, Cash Balance plans have increased from 2.9% to 34% of all defined benefit plans.

**Cash Balance Plans by Year Established**

The number of Cash Balance plans nationwide has more than tripled since the 2006 Pension Protection Act (PPA).

**Cash Balance Plans by Size: Participants**

Small to mid-size businesses continue to drive the growth of Cash Balance plans throughout the country.

**Cash Balance Plans: Company Contributions to Employee Retirement Accounts**

Companies typically double contributions to employee retirement savings when adding a Cash Balance plan.

**Cash Balance Plans by Asset Size**

Cash Balance plan sponsors contributed $29.3B in 2015, increasing total assets to $1.1T nationwide.

**Largest Cash Balance Plans by Asset Size**

Cash Balance plans play a strategic role in benefits planning for many Fortune 100 companies.

**Interest Crediting Rates Chosen by Cash Balance Plan Sponsors**

‘Actual Rate of Return’ has become an increasingly popular choice.

**Interest Crediting Rates Chosen by Large Cash Balance Plan Sponsors**

Larger plan sponsors are turning to innovative “investment choice” plan designs.

**Cash Balance Plans: Regional Concentration**

California and New York lead in number of plans, while Maryland and Florida have the fastest growth.

**Cash Balance Plans by Business Type**

America’s healthcare, technical, legal, and financial sectors lead the way in adopting Cash Balance plans.

**Defined Contribution Plans Associated with Cash Balance Plans**

Plan combinations allow business owners to optimize tax efficiency and maximize retirement savings.

**About Kravitz**
The popularity of Cash Balance plans has soared since 2001, with double-digit annual growth almost every year, and a fifteen-fold increase over 15 years.

**What’s behind the remarkable growth in Cash Balance plans?**

- **Rising taxes**: Rising federal, state and local tax rates have motivated many business owners to maximize tax-deferred retirement savings and take advantage of tax deductions for contributions to employee retirement accounts.

- **Hybrid appeal**: These “hybrid” plans combine the high contribution limits of a traditional defined benefit plan with the flexibility and portability of a 401(k) plan. They also avoid the common risk factors and runaway costs involved in traditional defined benefit plans.

- **Legislative changes and broader options for plan sponsors**: The 2006 Pension Protection Act affirmed the legality of Cash Balance plans and made the plans easier to administer. New IRS Cash Balance regulations in 2010 and 2014 expanded investment options, minimizing many funding issues.

- **Retirement savings crisis**: Frequent media coverage of the Boomer generation’s lack of retirement preparedness has prompted older business owners to accelerate savings and maximize qualified plan contributions.
In the past 14 years, Cash Balance plans have increased from less than 3% to 34% of all defined benefit plans. Traditional defined benefit plans have been steadily declining since the mid-1980s, due to a complex array of risk issues, runaway costs, and major changes in workforce demographics. Some larger corporations converted existing defined benefit plans to Cash Balance, while hybrid plans also became increasingly popular with small to mid-size businesses.

**Why are Cash Balance plans rapidly replacing traditional defined benefit plans?**

- **Lower risk:** Cash Balance plans remove the interest rate risk that led to constantly changing value of liabilities in traditional defined benefit plans.

- **Removing cost volatility:** The structure of a Cash Balance plan prevents runaway costs for employees nearing retirement age.

- **Easier for employees to understand and appreciate:** Cash Balance plans are similar to 401(k) plans in terms of showing individual account balances. Some plans even offer participant websites with daily updates.

- **Consistency and fairness:** These plans allow for more consistent contributions to employees, rather than uneven age-based contributions.

- **Full portability:** Account balances can be rolled over to an IRA, a necessary option for today’s mobile workforce in which many employees change jobs every few years.
The number of Cash Balance plans nationwide has more than tripled since the Pension Protection Act (PPA) came into effect in 2006. The first Cash Balance plan was established by Bank of America in 1985, but the emerging hybrid segment of the retirement plan market remained relatively unknown for the next two decades.

**How are legislative changes accelerating the growth of Cash Balance plans?**

**2006 Pension Protection Act:** This law clarified IRS approval of the plans, removed any remaining uncertainty about their legal status, and introduced other changes that simplified implementation and administration. Thanks to this legislative shift, Cash Balance plans became a popular and viable choice for many small business owners.

**2010 IRS Cash Balance regulations:** New regulations published in 2010 provided greater clarity and expanded options for Interest Crediting Rates (ICR), making these plans even more appealing to employers. The new regulations also generated widespread media coverage and greater national awareness of the high contribution limits, tax advantages and recruitment/retention power of adding a Cash Balance plan.

**2014 Final IRS Cash Balance regulations:** Final regulations issued in September 2014 gave plan sponsors a compliance roadmap and greater investment flexibility, including the option to use fixed rates up to 6% and to include multiple investment options within a single Cash Balance plan.
Small to mid-size businesses continue to drive the growth of Cash Balance plans and the highest growth over the past five years has been in companies with fewer than 25 employees. Today, 92% of plans are in place at firms with fewer than 100 employees. Firms with 1 to 9 employees now account for 57% of all Cash Balance plans.

The largest plans (those with 10,000 or more participants) typically represent older traditional defined benefit plans that were converted to Cash Balance. These conversions may increase in the next few years as an alternative to terminating financially troubled defined benefit plans.

What makes Cash Balance plans so attractive to small business owners?

- **Cost efficiency and tax efficiency**: After staff costs, taxes are usually the largest expenditure for small businesses. Cash Balance plans help owners with a significant tax deduction for employee contributions, plus generous tax-deferred retirement contributions for themselves.

- **Asset protection**: As with any IRS-qualified retirement plan, Cash Balance assets are protected in the event of a lawsuit or bankruptcy.

- **Catching up on delayed retirement savings**: Age-weighted contribution limits allow older owners to squeeze 20 years of savings into 10. Owners can typically double or triple the pre-tax deferrals they were able to make in a defined contribution plan.

- **Attracting and retaining talented employees in a tight labor market**: Defined benefit plans such as Cash Balance are more appealing to many employees than typical 401(k) plans alone, giving small business owners a competitive recruitment advantage.

Company contributions as a percentage of eligible participants’ total annual payroll.

Companies typically double contributions to employee retirement savings when adding a Cash Balance plan

- **6.6% of pay** – average employer contribution to non-owner employees in companies with both Cash Balance and 401(k) plans.
- **3.7% of pay** – average employer contribution to non-owner employees in companies with 401(k) only.

Typically, Cash Balance plans require employers to contribute 5% to 8% of pay to non-highly compensated employees in order to contribute larger amounts for the owners. This is often more than double the contribution employees receive at firms with 401(k) alone.

Cash Balance plans provide other advantages to employees:

- Employees do not have to reduce their take-home pay in order to receive an employer contribution, since Cash Balance contributions (sometimes also satisfied through a profit sharing plan) are not based on a “match.”
- Employees do not have to choose their own investments or bear any investment risk.
- Plan assets are pooled and typically invested by the plan sponsor using a conservative benchmark, so retirement savings are protected from market volatility.
- Portability: When employees leave or retire, they have the choice of an annuity option or a lump sum that can be rolled over to an IRA.

*Source for data on employer contributions to 401(k) plans, 2008-2015: Plan Sponsor Council of America (PSCA), 59th Annual Survey of Profit Sharing and 401(k) Plans.

** Source for combination plans: analysis of Kravitz clients’ contributions to employee retirement accounts.
Total Cash Balance assets increased from $1T in 2014 to $1.1T in 2015. More than 75% of existing Cash Balance plans were established within the past nine years, after the 2006 Pension Protection Act clarified their legality. As relatively new plans, many still have assets under $500,000. This asset profile will shift over the next decade, as many business owners seek to maximize tax-deferred savings for themselves and optimize tax-efficient contributions to employees.

For most firms, a Cash Balance plan is an “add-on” to an existing 401(k) profit sharing plan that already has significant assets. See page 14 for an overview of the most popular plan combinations.

**Highlights: steady, stable growth**

- The median asset size of a Cash Balance plan is $515,228; the average is $57.9 million.
- 31% of Cash Balance plans have assets over $1 million.
- Cash Balance accounts increase each year in two ways: through an employer contribution (a flat amount or a percentage of pay) and through an interest credit. Both are specified in the plan document. See page 10 for a discussion of Interest Crediting Rates.
- The high percentage of plans with assets under $250K reflects the large number of new start-up plans at small firms, typically with fewer than 10 participants.

Total assets in all Cash Balance plans nationwide: $1.1T in 17,812 plans
Annual contributions for 2015: $29.3 Billion

Cash Balance plans play a strategic role in retirement and benefits planning for many large firms

While the dramatic growth in new Cash Balance plans has been driven mainly by small and mid-size businesses, these tax-efficient plans are also offered by many leading national law firms, hospitals, and medical groups. Select Fortune 100 companies maintain large Cash Balance plans, some of which were converted from older traditional defined benefit plans (see page 4 for more details). For many large firms, Cash Balance plans are a key tool for recruiting and retaining talented employees in a highly competitive labor market.
'Actual Rate of Return' and fixed rates rise in popularity

All Cash Balance plan participants receive an annual interest credit on their account balances, based on the specific Interest Crediting Rate (ICR) written into the plan document.

Prior to the new Cash Balance regulations published in 2010, an estimated 95% of Cash Balance plans used the yield on the 30-year Treasury bond, which averaged 4% over the past decade. The 2010 IRS regulations allowed many more options. Fixed rates have become the dominant choice, while Actual Rate of Return is a very popular option for larger plans (see page 11 for details).

**Actual Rate of Return:** this option allows plan sponsors to set the ICR to equal what the plan investments actually earn in the market (the “Actual Rate of Return”), rather than trying to target a specific interest rate every year. The employer’s investment risk is reduced considerably, and participants are protected by various investment rules.

Final IRS Cash Balance regulations released in September 2014 made Actual Rate Return an even more compelling option, as discussed on page 11.

* Based on Interest Crediting Rate (ICR) selections by 787 Kravitz Cash Balance clients.
Interest Crediting Rates Chosen by Large Cash Balance Plan Sponsors

Minimizing risks and maximizing investment options makes Actual Rate of Return appealing for larger plans

Soon after the 2010 Cash Balance regulations allowed plan sponsors to start using Actual Rate of Return as an ICR, we saw a significant shift in the large plan market away from the 30-year Treasury and toward Actual Rate of Return, typically with a cap between 4% and 5.5% to manage volatility. The employer’s investment risk is reduced considerably, and participants are protected by various investment rules, including the preservation of capital rule.

The final IRS Cash Balance regulations released in September 2014 made Actual Rate of Return even more compelling, since plan sponsors can now offer multiple investment options within a single plan, tailored to suit different retirement goals and needs. Kravitz large plan clients increased use of Actual Rate of Return by 17% last year.

Advantages of an Investment Choice Cash Balance plan:

- Meets diverse participant needs and goals
- Incorporates a range of investment strategies within a single plan
- Enhances flexibility for growing firms with many partners/shareholders
- Improves ability to attract and retain top talent

Cash Balance Plans: Regional Concentration

California and New York have been leading the Cash Balance sector for the past 15 years in terms of the total number of plans, and continued to do so last year. Together they account for 4,172 plans, or 23% of the national total. Florida and Maryland were tied for the fastest regional growth in new plans, each showing a remarkable 27% year-over-year increase.

Since new Cash Balance Plans are most frequently adopted by successful, profitable small to midsize businesses, their steady growth rates are a good indicator of the regional health of small business.

Other regional highlights:

- Cash Balance plans are increasing in all 50 states, and are now well represented in Puerto Rico, Guam and the US Virgin Islands.
- Maryland bumped Minnesota off the Top 10 list this year, demonstrating the fastest growth in the nation.
- While not yet in the top 10 Cash Balance states, Georgia, Virginia and Massachusetts are closing in rapidly with over 400 plans in each state and annual growth in new plans over 30%.
- Illinois barely made top 10 a few years ago and is now ranked #3 in the nation, likely driven by large numbers of medical and legal groups in the Chicago area along with many competing Cash Balance plan providers.

National Total 17,812

*Increase in total number of plans between 2014–2015, the most recent year for which complete IRS Form 5500 data is available.
America's healthcare, technical, legal and financial sectors continue to lead the way in adopting Cash Balance plans. These plans are an excellent fit for the retirement needs of professional services firms, because of their flexibility for multi-partner firms and high age-weighted contribution limits which allow older owners to double or triple pre-tax retirement savings.

Increasing diversity of businesses adopting Cash Balance plans:

- Manufacturing firms now account for 7% of all Cash Balance plans, a promising sign for the economy since owners need fairly predictable profit levels to meet the plan’s annual financial commitments.
- Medical and dental groups account for 37% of all Cash Balance plans nationally, and we expect to see continued growth in the healthcare sector effecting trends in the overall US economy.
- With many CPA and financial advisory organizations educating clients about Cash Balance plans, we expect even greater diversification of business types adding these plans.
- The “Other” category (11% of all Cash Balance plans) provides a compelling snapshot of the sheer diversity in types of businesses adopting Cash Balance plans. It includes everything from farms to funeral homes, from lobbyists to lighting technicians.
Plan combinations allow business owners to optimize tax efficiency and maximize retirement savings

- Very few firms have a stand alone Cash Balance plan; today 96% offer Cash Balance plans in combination with one or more defined contribution plans. The most common combination is Cash Balance with a 401(k) and/or profit sharing plan, allowing business owners to maximize contribution levels, flexibility, and tax efficiency.

- When a firm offers a combination of retirement plans, the IRS requires “cross-testing” to ensure fairness to all employee groups across all compensation levels. It is important to have an experienced, technically skilled actuarial consultant design a Cash Balance retirement program that will achieve the plan sponsor’s goals while passing all IRS tests every year.

- The average employer contribution to staff retirement accounts is 6.6% of pay in companies with both Cash Balance and 401(k) plans, compared with 3.7% of pay in firms with 401(k) alone (see page 7 for details).

- Thanks to steadily increasing demand for creative plan designs combining Cash Balance, 401(k) and Profit Sharing, top retirement plan consultants are finding new opportunities to develop a niche specialty with a competitive edge.
About Kravitz

Since 1977, Kravitz has brought its clients the latest in design, administration, and management of corporate retirement plans. Kravitz designed its first Cash Balance plan in 1989 and has become nationally recognized as an innovator and a leader in all aspects of Cash Balance plans. Today the firm manages more than 1,300 retirement plans across the country, including more than 800 Cash Balance plans.

Headquartered in Los Angeles, Kravitz has offices in New York, Chicago, and Atlanta, along with satellite offices in 11 other states. The Kravitz team of 85 employees includes 11 actuaries and many other highly trained and credentialed retirement professionals. Kravitz founded the Cash Balance Coach® training program in 2009, the only available Cash Balance certification program. More than 1,400 financial advisors and retirement professionals have enrolled, earning certification as Cash Balance Consultants. Kravitz has also published a book, Beyond the 401(k), an industry bestseller on the topic of Cash Balance plans as a business growth strategy.
